Product Overview

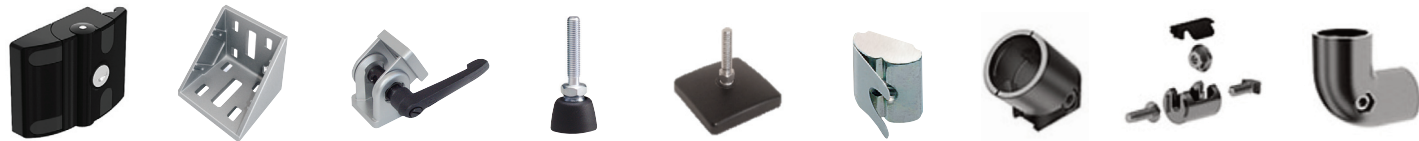

Aluminum profiles

A wide range of aluminum structural profiles, cable channels and tubing are offered for a variety of industrial and commercial applications. A2A systems offers more than 100 extrusion shapes to accommodate various industrial applications.

Aluminum profile system components

A2A Systems offers the largest selection of aluminum profile system components in today's market. Manufactured by Fath, backed by decades of German manufacturing expertise and continuous innovation, we offer over 7,000 products for you to choose from.

Industrial hardware

Decades of experience in manufacturing components inspired Fath to create a new line of industrial components. With over 500 products available and many "industry firsts", the innovative Fath industrial hardware line is steadily growing.

Lifting and positioning systems

Ergoswiss is the market leader in lifting and positioning systems offering flexible solutions and systems for various designs and markets. The precision Swiss-made single-action micro-hydraulic or electric spindle driven system has decisive advantages over conventional systems. Lift, position or tilt new or existing structures to achieve the ergonomic height - solutions for **everyBODY!**

Modular transfer elements

A2A Systems is your partner for cost effective material transfer. A large variety of modular components provide unique flexibility for a customized solution.

Service Overview

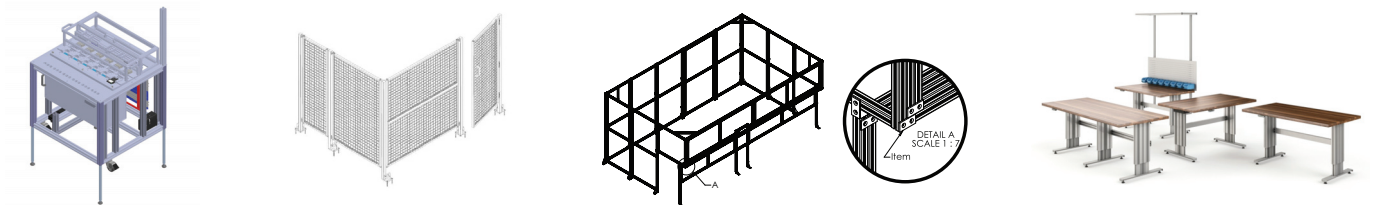

Building materials

A wide range of aluminum structural profiles, cable channels and tubing are offered for a variety of industrial and commercial applications.

Design Support

We offer design and consultation services. We translate customer supplied content from sketches to full 3 D models including rendering, technical documentation and structural analysis.

Full assemblies or kit solutions

Projects can be supplied fully assembled or cut to size in kit format assembled by the client. All kit parts are labelled and supplied with a drawing.

Delivering to the global community

We pride ourselves with quick turn-arounds and ensure premier packaging.

Onsite installation

After a project has been processed, we offer on-site installation, set up and testing.
